General Information

Short summary

A Cyprus based company is manufacturing and selling skateboards using a cutting-edge material to increase performance, durability and sustainability. The company is interested in partnerships on the basis of a commercial agreement

Full description

Born in the heart of Nicosia, Cyprus in 2015, Capsule Skateboards isn't the average board builder. They're a crew of passionate individuals pushing the boundaries of skateboarding with a unique blend of innovation and sustainability.

Capsule Skateboards stands out for their high-tech approach. Instead of traditional maple wood, they meticulously craft their decks from a special, high-quality polymer compound. This cutting-edge material, developed through rigorous research by their team riders and engineers, delivers a whole new level of performance. Imagine boards with an incredible pop and a ride unlike anything you've experienced before, thanks to the stronger construction of the polymer.

But Capsule Skateboards isn't just about performance. They're deeply committed to sustainability. Their innovative polymer decks are not only built to last, but they're also recyclable. At the end of their long lifespan, these boards can be reborn into new skate decks or even transformed into other eco-friendly products.

By prioritizing sustainable materials and responsible manufacturing practices, Capsule Skateboards offers a solution for the environmentally conscious skater. They're carving a new path in the industry, proving that high performance and environmental responsibility can go hand in hand.

The company is interested in a partnership on the basis of a commercial agreement.

Advantages and innovations

- 100% Recyclable based on the closed-loop principle,
- No toxic resins or glues,
- Most durable,
- 20% more impact absorbing
- Their innovative technology can be applied to almost any board sport
