General Information

Short summary

A German company with extensive experience in manufacturing high-quality iron and special castings seeks a strategic investor to support its growth and modernization. The company offers access to stable European industrial markets, high-tech cast products and the opportunity for joint development in a variety of sectors, including mechanical engineering, automotive, and energy systems.

Full description

This family-owned foundry, based in Germany, specializes in the production of high-quality castings, including gray cast iron (GJL), ductile cast iron (GJS) and special alloys. With many years of experience, the company offers core competencies in sand casting, core production, and model-based process optimization. The company's expertise extends to engineering support, including CAD/CAE design, casting simulation and component optimization. Thanks to modern manufacturing technologies and a high level of metallurgical expertise, it can offer flexible production capacities that allow it to meet the needs of a wide range of industrial customers across various sectors.

The company's strengths lie in its ability to produce highly precise components, even in complex shapes, and its flexibility in handling production volumes, from prototypes to medium series. It also has integrated model-making capabilities that allow for quick adjustments, shortening development cycles and improving time-to-market. Strong customer relationships and reliable delivery performance have contributed to long-term, stable partnerships with several European industrial customers.

The products are widely used in sectors such as mechanical engineering, agricultural engineering, energy systems, automotive engineering, and hydraulics. The company benefits from its long-standing customer base and the repeat business that comes with a reputation for quality and reliability.

As the company looks to grow further, it is seeking an investor who can provide capital for continued expansion and modernization. The investment will help enhance the company's product offerings and allow it to enter new markets. The investor will gain access to a trusted European foundry with a strong presence in key industrial sectors, positioning them for success in an increasingly competitive global market.

Advantages and innovations

- Access to a stable and growing European industrial market
- High-quality, technologically advanced cast products with significant added value
- Proven reliability in delivery times and long-term delivery stability
- Strong engineering expertise and flexible production capabilities
- Opportunities to expand market access and drive digitalization and modernization

Partner Sought

Expected role of the partner

The company is seeking an investor who can provide capital for growth and support ongoing modernization efforts. The investor should bring industry expertise and assist in optimizing production and manufacturing processes. The partner will help expand the company's reach into new markets and customer segments, facilitate joint projects and new product lines, and open up new sales opportunities in terms of geography and sector. The ideal partner will have experience in driving innovation, internationalization and market positioning within the industrial manufacturing sector.
