General Information

Short summary

A Polish producer of various types of plywood with 20 years of experience on the market is interested in establishing cooperation with manufacturers using plywood for their products, distributors, and trading companies (distributors) from Japan

Full description

Polish company located in North East Poland is one of the largest distributors of plywood in Poland and in this part of Europe. It was established in 2005 and has considerably increased its market share ever since, currently selling the total of almost 20 000m³ a year.

The company supplies raw, filmfaced or HPL/CPL/PPL/ veneer plywood.

They offer a wide selection of high quality products, ranging from a variety of raw to filmfaced hardwood and softwood plywood. In addition to standard products, they also provide special types of plywood, such as fireproof, laser-cut, flexible and PPL covered plywood. In addition, the company also manufactures semi-finished products, such as cut-to-size plywood, packaging boxes and heavy-duty boards for the vibration presses.

The company cooperates with suppliers from all over the world and have extensive contacts in the industry, allowing

for smooth deliveries and ensuring safety of distribution and production chains.

The company has a lot of plywood in their warehouse for construction, yacht, furniture, transport and other industries.

The company offers also:

- machinery-treatment, including CNC
- cutting and drilling,
- pressing HPL/CPL etc.
- painting the edges,
- special packaging, installing all kinds of fittings, and others.

The goods offered are made to the strictest European technical standards. Plenty of them possess the FSC, CARB, TSCA, BFU 100, as well as fireproof B and C class certificates.

They provide their clients with full technical support, always recommending the best cost-reducing solutions.

Advantages and innovations

Highly experienced in plywood manufacturing.

Technical specification or expertise sought

Stage of development

Partner Sought

Expected role of the partner

The potential partners can be Japanese SMEs, and large companies, wholesale and retail companies, engaged in the trade of construction materials (e.g. scaffolding/formwork, parquets), furniture manufacturers, wood processing enterprises, companies related to manufacturing of transportation (yachts, campers, kennels, car/truck bodies), and other wood products.

The expected role of the partner would be the establishment of commercial cooperation between Polish and Japanese company regarding the provision of plywood products.
