

**Title**

The Danish company, <https://www.partisia.com/about/>, empowers innovative privacy enhancing solutions and is now looking to connect with key networks and influential individuals to help strengthen their market presence and awareness about their innovative solutions for Multi-Party Computation (MPC) and advanced cryptographic enforced privacy.

**Short summary**

Partisia was established in 2008, combining Multi-Party Computation and Blockchain solutions. Today Partisia is well-established, particularly in Denmark and Japan, and is now looking to connect with key networks and influential individuals to enhance its presence and brand awareness, especially in Japan, South America, India, Singapore, Scandinavia and DACH countries.

**Full description**

Partisia is a company based in Denmark, which ranks among the top in the world in digital competitiveness and digital government progress.

Providing a platform where data from individuals, governments and private companies are able to stay encrypted and protected, and still fully enabled, creating the perfect balance between transparency and privacy.

Founded by pioneers who lead the world in the field of MPC and began the world's first commercial use of MPC in 2008.

**Advantages:**

Partisia is Setting a New Standard by:

- Pioneering privacy preserving solutions that enable seamless and compliant data sharing across individuals, entities and even across borders.
- Establishing industry best practices for handling confidential data with integrity and efficiency.

**Innovative & Privacy-Enhancing**

- Developing innovative, privacy preserving solutions that ensures secure data processing without compromising the individual's control.
- Simplifying regulatory compliance, allowing businesses to leverage confidential data safely and effectively.

**Type of partner sought:**First type of partner:

Partners who, based on their personal network and skills, can open doors to potential customers for Partisia. Partisia offers a commercial agreement to such resellers/consultants. It might f.ex. be IT-companies, software developers, IT-influencers and IT-experts.

The ideal partner has:

- Strong connections with executives (CEOs, CTOs, CIOs, and decision-makers) in relevant industries, such as:
  - Healthcare
  - Pharma
  - Finance
  - Insurance
  - Fintech
- Knowledge or a strong interest in:
  - Data Management
  - Consent & Privacy Regulations
  - Confidential Computing & Security

Second type of partner:

Relevant networks, clusters, industry associations, and similar organizations, where there is a forum for active industry and technology discussions, thoughts about leadership, and advisory roles.
