

Sunday Brush

Mineral sunscreen powder SPF 50

Sunday Brush is an all-natural mineral powder that protects the skin against harmful UV radiation.

The sunscreen powder has a high UVA and UVB protection factor of SPF 50, which helps protect against sunburn and skin ageing.

The product is easy to apply with the self-dispensing brush. The natural minerals in Sunday Brush do not penetrate the skin and are suitable for all skin types, including sensitive skin.

The mineral sunscreen powder can be applied over makeup and is ideal for quick SPF touch-ups throughout the day. The silky-soft, self-dosing brush is easy to use and convenient to take with you wherever you go. Works immediately after application.

Available in the 4 natural skintones
Light, Medium, Tan and Dark

Broad spectrum protection

Protects the skin from UV-A, UV-B, IRA and Bluelight.

100% natural formula

Without any chemical ingredients

ADVANTAGES SUNSCREEN POWDER

1. Suitable for the very sensitive skin
2. Easy to apply and re-apply
3. Mineral sunscreen powder reflects UV-rays
4. Natural (Japanese) ingredients > 100 % natural formula

Bonus: Easy to take where ever you go

INGREDIENTS

Sunday Brush is made from 100% natural minerals with no chemical additives, making it entirely unique in the world of sun protection. The active ingredients in this powdered sunscreen are titanium dioxide and zinc oxide, which are not absorbed by the skin but form a protective barrier.

Titanium dioxide is an effective and natural mineral that protects the skin by blocking UV radiation. Zinc oxide is also extremely effective at blocking UVA and UVB radiation and is known as a broad-spectrum sunscreen. This natural ingredient also has calming and antibacterial properties.

INCI: Silica, Zinc Oxide, Titanium Dioxide, Jojoba Esters, Helianthus Annuus Seed Oil. (+/-: CI 77491, CI77492, CI 77499).
Contains: 6 gram Sunscreen Powder
