

Next Hydrogen Generation – eFuel to Power the Green Transition

KOTA MATSUE

Vice President & General Manager R&D Centre
MAZDA MOTOR EUROPE

SUMMARY

1. Renewable hydrogen, the basis for climate neutral society
2. Multi-solution approach
3. E-fuels

1. RENEWABLE HYDROGEN, THE BASIS FOR CLIMATE NEUTRAL SOCIETY

Renewable hydrogen is a clean and versatile energy that can be modified for different applications

2. MULTI-SOLUTION APPROACH

Multi-solution approach offers the best suited solutions for the decarbonization of transport based on multiple technology approaches

3. E-FUELS

E-fuels can ensure a faster transition to sustainable mobility

THANK YOU
