Explanation of terms		
<i>Date</i>		
Category	<p>The Japanese government uses its own numbering systems to categorize its contracts on offer. 1-26 concern contracts to procure goods. 41-41 concern construction and architectural and technical services. Numbers 51 and higher concern procurement of services. In many cases contracts are categorized using multiple numbers. National Government categories above 100 and regional government categories from 80 and above were added at the time of the conclusion of the EU-Japan EPA. (Annex 5(a) and 5 (b))</p>	More details on EPA
Notice_Type	<p>The Digests will commonly include the following types of notices:</p> <ul style="list-style-type: none"> - Contract notice: Invitation to participate in an open competitive tender procedure. Suppliers who meet the conditions for participation can take part. - Contract notice (Multiple lots): Some procuring entities bundle multiple procurement contracts into one notice. The actual procedure will however be separate for each contract. - Contract notice (EPA framework entity): Invitation to tender by a government entity added by the EPA, in principle suppliers from other countries than EU/UK cannot participate) - Contract notice (PPP/PFI): Invitation to submit proposals for a contract that uses Public Private Partnership (PPP) /Private Finance Initiative (PFI) methods to develop a public services. In Japan this is often seen for construction and management of public facilities such as parks, libraries etc. - Prior Information Notice: In Japanese these are called "Notices of request for submission of materials" and are one of the steps before an actual tender. A government entity is requesting information from the market necessary to draft specifications for a tender. Japanese government entities publish relatively few PINs to an international market, they are often issued for lease contracts. - Request for Comments: In case a government entity has drafted specifications for an upcoming tender, but wants to receive feedback on it from the market, it can issue a request for comments. Interested suppliers can then verify and comment on the feasibility of the specifications. <p>Public Offering Proposal: Public Offering Proposals are usually used for contracts categorized with no. 42 = 'Architectural/Engineering & other Technical Services' where suppliers are required to submit technical proposals.</p> <p>Bidding feasibility check Government entities in some cases publish notices to find out whether there are potential suppliers available in the market. If not interested parties are found the contract is awarded in a single tender without competition.</p> <p>In case the contract concerns another type of public tender, additional explanation is provided</p>	
Item purchased	Description of the item or service the government entity wishes to procure.	
Government entity (link)	Name of the government entity, with a direct link to its procurement information website.	
Region	The reason for mentioning the region where a government entity is located has to do with the unified supplier qualification system for national government entities. This system uses the administrative division of Japan into 8 different regions and suppliers will need to have a supplier qualification valid for that region.	Regions

Supplier Classification	<p>Japanese government entities require their suppliers to possess a qualification as supplier before they are allowed to join a competition. In case of national government and many organizations listed in Annex 3 of the WTO Agreement on Government Procurement (GPA), suppliers can use the Unified Supplier Qualification System. This is a common qualification valid for all central government entities. The application for this certificate is free, and it will classify suppliers into a certain category ranging from A (large companies) to D (small companies). Government entities will in turn use this to limit the number of eligible suppliers. Validity of this certificate is maximum of three years. Approaches taken by government entities vary, while some ministries rigidly apply limitations based upon the size of the contract, other organizations do not use the classification and wish to invite an as broad as possible supplier base.</p> <p>Other organizations will have their own supplier registration systems, where companies will have submit documentation about their capabilities, financial health etc. during the tender process.</p> <p>Prefectures and cities have their own qualification and supplier registration systems, usually valid for a maximum of 2 years. In many cases they will use letter codes as well to classify their supplier base. When found in the tender invitations, this classification is added in the digest.</p> <p>Abbreviations: TMG = Tokyo Metropolitan Government</p>	More details on Supplier Qualifications
Licenses	<p>If further information of licenses is provided in the invitation to tender, it will be included in the Digest. Please note that in many cases the licenses or experience required for a project are listed in the tender guidelines and are not listed in the invitations.</p>	
Explanatory Meeting	<p>While not yet common, in more complex procurement, the government entity will organize an explanatory meeting concerning the contract on offer. Increasingly, these meetings are also online, but physical meeting is still the norm. In some cases, the period between tender announcement and explanatory meeting is very short and often a sign that the meeting is more a formality.</p>	
DL for registration/Expression of Interest	<p>It is important to keep in mind that invitations to tender in English often do not include the deadlines for expression of interest or registration as participant! Because this period is often much shorter, preparation of required documentation can be quite challenging. If the Japanese version of the invitation to tender contains these deadlines, they will be included in the Digest</p>	
DL for bid-submission	<p>The deadline for submission of bids should be listed in an English notice. For WTO-regulated procurement, the Japanese government strives to give suppliers at least 50 days to prepare their bids, which is 10 more than WTO requires. However, in practice the deadlines for expressions of interest, when documents deciding eligibility need to be prepared, make this period somewhat irrelevant.</p>	
Contact	<p>The contact information listed in the digest, in most cases it the same as listed in the English-language invitation to tender. However, if additional information such as email-addresses etc. available in the Japanese notice or in our databases, this is added to the contact information</p>	
Assessment method	<p>The lowest price is still the most commonly used method to decide which supplier is awarded the contract. However, plan competition and Overall Greatest Value assessments are increasing, in particular in public works construction and also increasingly in IT contracts.</p> <p>Assessment methods where the quality of the proposal is assessed in combination with price, can give foreign suppliers a better chance to win a contract.</p>	
Link with details	<p>Currently, the Japanese government does not provide direct access to details of contracts on the English-language procurement pages of JETRO. In the Digest, for each contract included, we try to locate the tender details online at the government organization's website. This can range from just the invitation to tender, that is also shared on the JETRO portal to the complete set of tender specifications. In case the information is not accessible via a direct link, we will download the information and place it on the Centre's website in a compressed ZIP-format. Tender information placed on the Centre's website will remain there for a maximum of 2 months (Contact us, in case the link is no longer functional) If no further information is available online, the link will refer to the Japanese invitation to tender on JETRO.</p>
