

Opportunities to Partner with La Princesa Institute for Health Research

Who we are:

La Princesa Institute for Health Research works to provide scientific skills to companies interested in innovation. Day after day 500 scientists work in our Hospital research laboratories located in *Madrid (Spain)*

Our commitment is to both promote innovation and facilitate the transfer of knowledge to the private sector in an effort to achieve significant public health benefits.

Research areas:

- Cellular and molecular etiopathogenic mechanisms in inflammatory and autoimmune diseases.
- Translational neuroscience: Neurotransmission, pharmacological neuroprotection and neurodegenerative and neuropsychiatric diseases.
- Advanced therapies and individualized medicine.

What we offer:

- **Our advanced research platforms and facilities** (Cleanroom, Biobank, Biologic Therapies Unit, Flow Cytometry Unit, , Genomic Service, Electron Microscopy Service, Animal Facilities, Proteomics Service and Confocal Videomicroscopy Service)
- **Out-licensing opportunities** for pharmaceutical and medical device companies who aim to quickly expand their patent portfolio.
- All phases of **sponsored clinical studies**.
- **Research partnerships** with industry.
- **Joint participation** in international and european research projects.
